PROFESSIONAL SUMMARY

I am a Mortgage servicing specialist in a highly adaptive role, I have a passion for helping people understand their true potential and I also have an affinity for knowledge. I've learned multiple different programming languages, resulting in a Full Stack accreditation from Coding Dojo. Which include Application development, UX/UI Design, Algorithms, Object-oriented design, and the ability to pick up new technologies quickly and implement them immediately. I come from a background of industries including mechanics, customer service, external & internal clientele, and project based teams along with non-profit organizations.
